Hiring Manager

Barclays

Dear Awantika Ma'am, Thamarai Sir,

I'm enthusiastic about applying for the **Data Governance Analyst** role at **Barclays**, where I see a strong alignment between my skills and the firm's data-driven culture.

I specialize in Data governance, Python, SQL, ETL, pipeline validation, data lineage, compliance, and I've used these skills to deliver measurable impact.

Why Barclays? I'm drawn to Barclays because of its strong reputation in financial innovation and commitment to data governance excellence. This role excites me as it allows me to contribute to building robust, future-ready data frameworks in a globally impactful environment.

What I bring:

- **Built automated pipelines that validate, transform, and reconcile data across multiple sources, ensuring governance and integrity in reporting.**
- **Created dashboards that integrate data lineage and business KPIs, improving both transparency and decision-making.**
- **Worked with global clients where ensuring data compliance, accuracy, and auditability was critical—strengthening my governance-first mindset.**

I'd be glad to discuss how my combined experience in analytics and engineering can help strengthen Barclays's data governance and reliability frameworks.

**Best regards,**

**Vishnuvardhan Chowhan**
