Hiring Manager

daddaa

Dear Vishnu Logics637,

I'm excited to apply for the **xxxx** role at **daddaa**. With a strong foundation in full-stack development, I bring proven expertise in building scalable applications and crafting seamless user experiences.

I specialize in React.js, Node.js, TypeScript, REST APIs, SQL, Full Stack Architecture, and I've applied these skills to deliver impactful projects.

Why daddaa? asdd

What I bring:

- **Built end-to-end web applications with React.js, Node.js, and TypeScript, gaining strong expertise in both frontend and backend.**
- **Designed modular APIs and scalable database interactions for workflow automation and real-time insights.**
- **Implemented secure role-based access systems and optimized backend performance for large-scale data operations.**

I'd love to discuss how my full-stack expertise can help daddaa build scalable and user-focused applications.

Best regards,

Sakshi Gawande
