

VISHNUVARDHAN CHOWHAN

Data Analytics & Automation Specialist | Hyderabad, India

September 04, 2025

Hiring Manager

Onfinance

Dear Anuj, Priyesh & Samyak,

I'm enthusiastic about applying for the **ETL Engineer** role at **Onfinance**, where I see a strong alignment between my skills and the firm's data-driven culture.

I specialize in Python, SQL, Pandas, Big Data, ETL pipelines, workflow automation, and I've used these skills to deliver measurable impact.

Why Onfinance? I want to join OnFinance because the idea of powering AI-driven compliance with rock-solid data pipelines excites me. Building ETL flows that transform raw data into reliable insights is my passion, and this role lets me do exactly that at scale.

What I bring:

- **Designed and deployed Python-based ETL pipelines to clean, transform, and standardize millions of rows of data, demonstrating my ability to manage and scale large datasets efficiently.**
- **Automated end-to-end reporting workflows, reducing manual effort by 80% and highlighting my strength in streamlining repetitive processes through automation.**
- **Built robust SQL and Python scripts for data cleaning, validation, and transformation, showcasing my focus on improving pipeline reliability and ensuring data accuracy.**

I'd be glad to discuss how my background in building reliable data workflows can strengthen Onfinance's data infrastructure and support downstream analytics.

Best regards,

Vishnuvardhan Chowhan
